CALL FOR PAPERS FOR SPECIAL ISSUE NO. 2 - 2016

“Emerging Challenges and Opportunities in Veterinary Research for Improvement of Animal Health”

Important Dates: Submissions: Nov. 1, 2015 to March 15, 2016; **Date of Publication:** April 30, 2016

Lead Guest Editor

Dr. V. Gnanavel, M.V.Sc., Ph.D

Scientist

Virology Division, ICAR-Indian Veterinary Research Institute (ICAR-IVRI),
Mukteswar, Nainital, Uttarakhand, India, E-mail: gnanamvirol@gmail.com

Guest Editors

1. Dr. V. Balamurugan, M.V.Sc., Ph.D.,

Senior Scientist

ICAR-National Institute of Veterinary Epidemiology and Disease Informatics (NIVEDI),

Post Box No. 6450, Yelahanka, Bengaluru -560 064, Karnataka, India.

E mail: balavirol@gmail.com; b.vinayagamurthy@icar.gov.in

2. Dr. M. Nagalingam, M.V.Sc

Scientist

ICAR-National Institute of Veterinary Epidemiology and Disease Informatics (ICAR-NIVEDI)

Ramagondanahalli, Yelahanka, Bengaluru, Karnataka State, India, E-mail: nagar75@gmail.com

3. Dr. M. Saminathan, M.V.Sc

Scientist

Division of Pathology, ICAR-Indian Veterinary Research Institute (ICAR-IVRI)

Izatnagar, Bareilly, Uttar Pradesh, India

E-mail ID: drswamyvet@gmail.com

4. Dr. P. Perumal, M.V.Sc., Ph.D., M.B.A., D.C.A.

Scientist (Animal Reproduction)

National Research Centre on Mithun, Indian Council of Agricultural Research (ICAR)

Jharnapani, Medziphema – 797 106, Nagaland, India.

E-mail: perumalponraj@gmail.com, perumal_ponraj@yahoo.com

Aims and Scope

Emerging infectious animal diseases are major threat to Indian livestock and poultry sector and affect production and health including animal and public health. This issue focuses on challenges and opportunities in veterinary research for the improvement of public and animal health. Improving animal and human health by development and evaluation of diagnostics, vaccines, biologicals, natural and synthetic drugs, biosafety measures for handling pathogens and recombinant organisms, strategies for effective control of zoonotic, exotic and emerging diseases by improved diagnostic tools and vaccines. Epidemiological investigation and understanding of pathogenesis and pathology of important transboundary and emerging infectious diseases including zoonotic infections will be also considered. This special issue will deal with latest advancements in diagnostics, vaccines and epidemiology to control and prevent emerging/zoonotic animal diseases. This issue will consider research and review articles that deal with new challenges and opportunities in veterinary research to improve animal and human health.
